## EZ Street Low Permeation Fuel Hose

Our new series of EZ Street Low Permeation Fuel Hose is made to SAE 30R9 Specifications.

Compatible with all of today's pump gas, our new EZ Street Hose will be right at home on your car using E85, E98, Diesel, Methanol, or other Ethanol Blended Fuels.

The Hose features a Nitrile based tube that prevents 99% of hydrocarbon fuel vapors from escaping. This drastically reduces fuel odors over standard synthetic rubber hose used in the automotive racing industry.

It also features an Aramid Reinforcing Braid that keeps the hose from collapsing while routing through the car and it makes it suitable for use in both carbureted and fuel injected applications up to 175 PSI.

Available in standard size -6 AN, (3/8" ) and -8 AN, (1/2") for higher horsepower applications.
